

Figure 1

The figure shows a coordinate system with the x-axis labeled "Number of Subjects per Group (n)" ranging from 0 to 100, and the y-axis labeled "Number of Groups (k)" ranging from 0 to 10. A diagonal line representing the equation $N = nk = 100$ runs from the top-left towards the bottom-right. Along this line, several data points are plotted at integer coordinates where $n \times k = 100$. These points are connected by horizontal and vertical line segments, creating a stepped path that follows the diagonal.
